Course Information

Certificate in Wildlife Conservation

OVERVIEW

Get certified in wildlife conservation. Learn about steps to conserve wildlife, identify and recover vulnerable habitats and apply your knowledge in a research project focusing on an endangered species in your area. The Career Academy can help you build a foundation for a career as a changemaker with our wildlife conservation courses online. Understand essential concepts like biodiversity, wildlife management, and ways to protect an ecosystem or habitat. This certificate could help you develop skills across tourism, conservation, wildlife management or research and development. Enrol now to discover solutions to wildlife conservation challenges that empower you to contribute to positive change.

- Work towards a career that matters in wildlife conservation
- Grow your understanding of the survival connections between species
- Identify real-life solutions that are present in the movement to conserve our wildlife
